

National Science Foundation Sponsored Research Experience for Undergraduates at the University of New Mexico

Research investigates culture, demography, and health among the peoples of Vanuatu, an island country located in the South Pacific. Students will be trained in ethnographic methods and collecting health data.

Recruiting NOW for positions starting in spring 2023, summer 2023 (two-week field course in Vanuatu), and into 2023-24. This research experience is FREE. Students will be supported with stipends and paid travel expenses. All undergraduates are welcome to apply, including 1st and 2nd year students.

For more information on how to apply, including flexibility in ways to participate, please contact Prof. Siobhán Mattison (smattison@unm.edu) or Prof. Ian Wallace (iwallace@unm.edu) in the Department of Anthropology.
