

FUTURE FOSSILS ON FANS

Two-year funded undergraduate paleontology research opportunity from late Fall 2024 to late Fall 2026.

Four undergraduate students will each receive a stipend of \$2500 per year for participation in the project plus a possible 6CR of Honors College credit each year for research. Participation will involve 5-6 weeks fully funded fieldwork in Paraguay and Petrified Forest National Park, Arizona in June and July each year, 1 fully funded trip to a major research conference in 2025 (Birmingham, UK) and 2026 (US location TBD), and the option to take 3CR in Honors in Spring and Fall 2025 and 2026.

No prior research or paleontology experience is necessary or expected. Freshman and sophomore applicants are strongly encouraged.

Apply by email to Jason Moore (jrm@unm.edu) briefly stating:

1. why you are interested in joining the field crew,
2. any skills or experiences that you may have had that might be relevant (think broadly - as well as science we're interested in building relationships with the communities with which we work, communicating our science broadly, and running a successful wilderness field season).

Deadline = September 20th 2024

A round of interviews will then be conducted and final candidates will be selected by October 9th 2024.
